About the application

Application number: 2025/93572	
What is the application for?:	Outline application with all matters reserved, bar vehicle access into the site,
Address of the site or building:	Land South of, Barnsley Road, Upper Cumberworth, Huddersfield, HD8 8NN
Postcode:	

User comments

Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	Yes

OBJECTION
I have literally just managed to escape Cumberworth before you attempt to destroy it by increasing the size of a village by an unsustainable amount. I feel so strongly about this destruction that even though I have just moved away, i must protest.
Objections -
Destruction of an area Kirklees itself describes as being vital in its biodiversity plan.
Destruction of an area that Kirklees describes as a wildlife corridor
Destruction of woodland and habitat that Kirklees describes as being important for it being the home of the northern wood ant. Kirklees itself says these creatures must be protected and helped to thrive.
Putting designated ancient woodland at risk due to building too close...Woodland trust says 50m. 10m is a joke.
Putting designated ancient woodland at risk due to run off water, foul water and all the other contaminants coming form the site.
Putting our heritage at risk - neolithic buildings in the woods and elsewhere around the site.
Its greenbelt farmed land if you hadnt noticed. Its been farmed forever, just not by the owners. It has sheep overwintering with winter parsnips as their specifically planted food, which allows the sheep thrive and fertilise the land.
transport links are literally non existant, so every journey will be a car journey.
The sovereign junction, that well known accident black spot will get even more dangerous as 250 extra cars go back and forth.
All the water pipes have had it, especially in that field and surrounding area.
no facilities
no doctor
no dentist
not enough school places
even the post office objects
make them build on brown and grey sites, there are plenty,
You dont need to build on our protected green belt. Make them work for their money. They are builders, they will build.
