Subject: Upper Cumberworth 2025/60/93572/E planning objection

However I strongly object to fertile green belt land being built on:

1. Green belt land should be preserved for future generations.
2. The proposed housing development is poorly located regarding access to services, employment and facilities.
3. The development would significantly alter the rural landscape for miles around.
4. The ancient woodland and its wildlife habitat would be severely affected, including the roe deer, buzzards, barn owls, tawny owls, herons, hedgehogs, and bats.
5. The roads are already are already dangerous with many accidents at the Sovereign cross roads and Carr Hill lane ... Speeding is an issue too. The volume of traffic with associated planned housing will make this so much worse.

Please do not process this development
