<p>I regularly visit MY niece and her family in Upper Cumberworth and have done so for over 20 years and I have always appreciated the views of both the conservation part of the village which can be seen from so many aspects of the village . I have enjoyed walks through the ancient woodland and would hate to see the views obliterated and the delicate ecological balance of the ancient woodland be affected be that by additional footfall from the development or additional dogs or predatory cats or flooding from runoff / failure of the attenuation tanksit only takes one incident ! There will undoubtedly be pollution incidents during the construction stage from such a large site even with safeguarding practices in place . With climate change we have all experienced the increased amount of rainfall during the winter months and this will increase the chances of pollutants seeping into the woodland from the soil and into the brook .I really do not want this development to be the eyesore that greets everyone entering Upper Cumberworth .</p>
