<p>I have been visiting family in Upper Cumberworth for over 25 years and the village is made up of a conservation part and the green open space as you approach the village from Denby Dale .This land is greenbelt and not in the local plan and the proposed development is completely disproportionate to the rest of the village .I feel that the ancient woodland would be negatively affected by not just the preparation and construction processes but also by the substantial number of people who would live in these properties together with any pets .Residents on Carr Hill and Park Lane will be severely affected long term by the loss of views towards the conservation part of the village and also the ancient woodland . The residents would also be severely affected by the noise ,dust and poor air quality during the ground preparation and construction stages as well as the poor air quality as a result of approximately 246 further cars in the village .Barnsley road is a very fast road despite the speed restrictions and a further opening will just exacerbate the issue . I feel that the village will lose its rural feel if this development is allowed to proceed.</p>
