<p>I live on Park Lane immediately adjacent to the site . At the moment I look out onto the green belt field with views of the conservation part of the village and particularly the church spire .The development will block these views .The village is small and this development will dwarf the village . The village does not have the infrastructure to cope with such a large development . The roads are congested and the junctions at the Sovereign and Carr Hill road are notorious for accidents traffic jams with Carr hill road already a "rat run ".The water and sewage pipes are old Victorian pipes and there have been numerous incidents involving burst pipes - the existing pipe works would not cope with a further 123 houses .The site is also adjacent to ancient woodland and this will be impacted by the construction process and afterwards by the extra footfall using the woods . Any slight changes will affect the ecology of the woods and the hedgerows . I regularly see deer in that field and have lived in my house for approximately 23 years and enjoyed the varied wildlife that have used the field . Such a large development would change the look and feel of the village .</p>
