| <p>This proposed site is in the pretty village of Upper Cumberworth .The site is opposite a conservation area - views of which would be obscured .There is a Tree Preservation on this land for 2 Sycamore trees .Deer can regularly be seen with their fawns .Bats swoop around the site in the evenings .Stoats and field mice can be seen scuttling into the hedgerows .Hares live in this field . Owls can be heard in the trees and barn on the site .The thought of the needless destruction of the ecology of this site is quite depressing .</p> <p>The development of the site would ruin the close knit community and ethos of the village .</p> <p>The ancient woodland adjacent to the site would be endangered by the presence of such a large site - not just the extra footfall but the extra household pets , noise pollution ,light pollution , the extra runoff and overflows from the attenuation tank and fumes from the extra cars.</p> <p>Because this is such a quaint village ,it does not have the infrastructure capacity to service such a large development .</p> | |
