<p>The planned development is on green belt land which is not appropriate. The land has not been included in the current local plan and should therefore not be under consideration. In winter/wet weather flooding can easily be seen in the centre of the field. Upper Cumberworth already struggles to cope with drainage and sewer capacity problems. Much of Carr Hill Road also suffers from repeated power cuts due to lack of capacity. We have a very limited bus service, but plenty of through traffic which will increase with the new quarry traffic adding to existing highway safety issues. The ancient woodland next to the proposed site is a facility treasured by the village. The footpaths are well used by local walkers, with and without dogs, as well as those following the Dearne Way. The potential loss of biodiversity and possible damage to the ancient woodland fill me with horror. We are a small village with an outdated infrastructure and few facilities, please do not allow a development which will harm our local landscape.</p>
