<p>I strongly object to the outline planning application as it will have a devastating impact in the local environment, community and wildlife.</p> <p>The ancient woodland, that contains an abundance of wildlife, would be terribly affected by construction and large scale earth works that are required for construction of 100 or more houses. Additionally the increase in non permeable areas such as driveways and streets will lead to the river dearne becoming contaminated by runoff and likely to be over its bank capacity.</p> <p>Furthermore, more residents in the area would seriously over crowd the facilities such as the doctors surgery, dentists (which currently have a very long waiting list for an appointment). Another hazard caused by the increase in local population would be the very busy roads that are not suitable for heavy construction traffic and after construction, would be greatly over capacity as new residents move in. There has already been many fatal accidents at the junction outside of the sovereign Inn and at the intersection of Carr Hill Road and Penistone road (A629). These terrible accidents will only increase in frequency if the local population continues to rise as a result of new housing developments.</p> <p>Overall, I think that this planning application is of great risk to the local community and environment.</p>
