I am writing to object to the proposed development of 123 houses.

The land in question is green belt and we should not be building on green belt.

There is an adjacent ancient woodland and the biodiversity of that will likely be damaged.

I understand there will be an adverse impact on the local water supply and sewage disposal.

The main rd is already very busy and the development would have an adverse impact on local traffic. Not helped by a local quarry being developed with some 120 lorry movements daily.

Any development would have an impact on school places and limited local amenities.

Regards.
