I would like to add to my original email, which you have already received.

I should like to add that in the past 2 weeks there have been skylarks and lapwings present above and also in the field earmarked for tarmac and concrete.

These species are both red listed in terms of conservation status and reductions in any habitat should not be permitted.

I remain shocked at this proposal and its impact on the local environment. Other effects including domestic pets and light were previously mentioned.

Please do not publish my address.
