<p>The field in question, gives us a first glimpse of the pennines when driving out of Denby Dale. it is an introduction to the open countryside. Placing housing here, would not be appropriate at all. This is Greenbelt and important land for the local ecology, as its topography assists the local hydrology of the watercourses. I have read the LLFA comments, is suggest they are redacted, as they are stating its acceptable to discharge surface water into a watercourse within ancient woodland. this is certainly not allowed. This water could be contaminated with detergents and cement waste, the LLFA are simply reading from a book and looking at this site with its own merits. Why are Vivly Living stating it is a natural extension tot he village? please can they explain how it is natural to introduce concrete and plastic? Also there are a few statements made by Vivly Living stating, there is housing need in this area. There certainly is not, houses are for sale in Upper Cumberworth all the time, at this current time there is 52 houses for sale within 1/2 mile of Upper Cumberworth. There is definitely no housing need.</p> <p>This site requires proaction measures to ensure this cannot and must not be developed upon. We are all sick of the landowners attempting to make money on land which is protected, where does it end.</p> <p>This is a protected GREEN field, long may it stay GREEN and protected!</p>
