| <p>I am a 12 year old girl living with my Mum and Dad in Upper Cumberworth. My bedroom overlooks the field and I am worried that I'm going to lose the view of the fields and woodland of Upper Cumberworth from my house and garden and when I go on walks round the area it will change completely if these houses are built. 123 is a lot! Its not just a few as Upper Cumberworth is only a small village. My Mum explained that the field is meant to be protected as Greenbelt land. If this is true then I think that this application should be stopped as the greenbelt should not be built on.</p> <p>I am also very scared about losing the homes for the deer in the field. They have their babies in this field and if there were 23 houses built, where will they go to have their offspring? They would move on and the local kids to Cumberworth in years to come would miss out on seeing this like we all have done.</p> <p>We also have bats in our garden that fly into the fields to hunt. I know this because watch them with my Grandad with my binoculars at dusk. The field means a lot to the bats as well as us humans who enjoy the landscape and animals. This spring we have also seen Goldcrest birds for the first time ever in the hedge that backs onto this field. My Grandad says these are rare too. I'm sure they won't stay long if the bulldozers are allowed to come onto the field to prepare for 123 houses. The local biodiversity means a lot to me and my family. It's one of the reasons we moved here. I thought the Kirklees council staff had a job to protect our green spaces? Please show me I am right in thinking this?</p> |    |
