| <p>Plans put forward seem bear zero consideration for local people, ecosystems, wildlife or amenities in the area.</p> <p>As a local resident I can personally speak of the current strain on GPs, traffic volume and reduced public services.</p> <p>There's no bus services from the planned site to any available doctors - forcing any new dwellers on site to walk / drive miles away to the closest available amenities, the local crossroads has seen enough casualties to warrant any more development in such close proximity.</p> <p>I drive past this land regularly, how can once sacred 'green belt' suddenly become accessible to such an eye soar development? To this day it is currently being used for agriculture and use change would destroy the local areas character let alone the ecosystem it supports.</p> <p>Regular way you can see a variety of deer, birds and other wildlife use the proposed site. Development in this location clearly infringes on local habitats and should be considered when cancelling these plans for development.</p> <p>I've seen report after report from professionals examining the proposals. Every conclusion the same. These plans fail to comply with just about every standard required to adhere to planning rules.</p> <p>Plans for development should be denied and green belt land should remain safe when so many brownfield sites are available for housing needs.</p> |    |
