<p>I am writing to add a further objection to my previously submitted objection.</p> <p>I have read the Yorkshire Water report and I see that they have strongly objected to the proposed build of 123 houses in my village. They report that the existing sewer network does not have sufficient capacity to support a development of this size. As I live along the perimeter of the field on Carr Hill Road, I have first hand experience of the sewer problems and the flooding that they mention. My garden wall is currently down due to a fairly recent occurrence of flooding, I have evidence to support this if needed.</p> <p>As Yorkshire Water say this site is not allocated in the Local Plan and because of this there is no funding to support this application. As residents of Upper Cumberworth we already face these problems of flooding, poor water pressure and leaks in the road, which leads to further build up of traffic. We need you to understand the limitations of this sewage system that already exists and to understand that it cannot cope with these additional houses.</p> <p>I urge you to rethink this whole thing for the good of everybody, it's your responsibility to protect the Greenbelt and protect our village.</p>
