<p>This is a further comment on this application . Although I no longer live in the village I still visit regularly and walk with friends in the woodland . Today the field was being ploughed and seeded , it is an active agricultural field , producing crops. We need this for food security in this country , we should not destroy any more green belt. The field ,if developed will be visible for miles , it will destroy the rural character and have a huge impact on the local character . The application should be refused, it is outside the local plan and is entirely speculative based on profit and greed.</p>
