Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:

Under 25 square metres

Please justify the reason why biodiversity net gain does not apply:

The proposal is for change of use only with no external works or land take. The development is therefore exempt from Biodiversity Net Gain under the de minimis exemption.

Note: Please read the help text for further information why developments may be exempt or not in scope.

☐ No

The existing property (formerly C3 dwelling) is already connected to the mains foul water sewer. Foul sewage from the proposed C2 use will continue to discharge to the existing mains connection, in line with building regulations and the requirements of the local water authority. Surface water will be managed separately in accordance with sustainable drainage practices.

Waste Storage and Collection

Do the plans incorporate areas to store and aid the collection of waste?

- ☒ Yes
☐ No

If Yes, please provide details:

The plan incorporate a dedicated, fenced area in the garden for the storage of bins. This area will facilitate the safe and hygienic collection of waste, including general refuse and recycling and is easily accessible for collection by waste services.

- ☒ Yes
☐ No
