<p>I'd like to support this application for the first floor extension.</p> <p>I don't live in the immediate area, but I regularly visit the graveyard next to the property where members of my family are buried, and I've admired this house for a long time. The previous works were done to a very high standard and, in my view, genuinely improved the look of the property and the wider area.</p> <p>I'm involved in work with several local councils and heritage areas, so I'm quite familiar with how important sympathetic design is — especially in conservation areas. This extension feels carefully thought out and in keeping with the existing building, rather than something that overwhelms it or looks out of place.</p> <p>I think it's really positive to see well-designed improvements to existing, attractive homes that allow families to grow and stay in the area, rather than relying on poor-quality new builds that often don't reflect local character.</p> <p>I've also seen that some objections relate to traffic and access, however the access serves a total of three properties, not just this one. It doesn't seem fair that the owners of this house are being held responsible for all vehicle movements to and from the shared access.</p> <p>Overall, from what I can see, this proposal respects the character of the house and the surrounding area and would be a positive addition rather than a harm.</p>
