Please accept this objection to the proposed plan for these new houses as above application

As everyone knows, who either lives on Latham Lane, or comes to enjoy the pleasant walk - Latham Lane is just a single track lane, where, over the years it has become much more 'crowded' than a country lane should be, and at times, walkers, dogwalkers, joggers, pushchairs, cylists, etc etc, and, as mentioned in another letter of objection, the local nursery is often seen trying to negotiate moving the little trains of nursery children and babies, over to anywhere they can actually move to .. to make them safe from the growing passing traffic. And something like this takes time, when there are more passing cars, lorries, vans waiting.
There is just one way in to the lane from the Drub Lane end, and then at the end, there is no access for traffic from there.

If anyone would need emergency services there would definitely be a risk of a long wait if there was any kind of congestion.

There surely is no need for an entry or exit in or out of Latham Lane, with this proposed site, because to do so, would cause much more havoc with extra traffic and people coming and going in what is now an area where most walkers can enjoy the relative peace, and the feel of being in an area where they can feel safe. There are also mature trees in and around this proposed site, which would probably 'have to go', whatever it suggests on the plans

Over the years this lane has had new build houses and businesses already adding to the congestion, and it is already a lane which is now becoming much more of a problem, especially with other new housing sites in and around the area, and the people who move there adding to the general 'use' of the lane, because it is a pleasant place to just walk and enjoy.

A concerned resident.
