<p>The overall project looks like it will be good for the village, however the black cladding will not be inkeeping as such the natural stone should be used to mitigate the amount of cladding required as in drawings Building C cladding 2030/2036</p> <p>Section B-B footbridge 2038 - this footbridge should be included from the original plans as i fear it will not be added in future, this will add access in the village from warehouse hill.</p> <p>Elevation D frontage the Window needs to be kept as best as possible.</p> <p>POSSIBLE FUTURE LINK FEATURE. SUBJECT TO RESERVED MATTERS APPLICATION pedestrian bridge 2035 - the green metal pedestrican bridges linking the east and west mill are components that should be kept in the original plans and not be a afterthought they are unique in the marsden mills developments - which could be modernised.</p> <p>I also feel that any stones that are reclaimed with dates on them stating what yeat that part of the mill was built should be re-sighted into a part of the mill so as not to loose them.</p>
