| In general this looks like a massive improvement for the village, creating more housing, jobs and green spaces, whilst removing what has become a bit of an eyesore. A gym with a small pool would be great, as would a community centre / hub. Please use environmentally sound design principles eg green energy, recycled building materials, grey water recycling where possible. Please consider a one way system and parking options for local residents. Also consider effect on local amenities eg schools, GP services. Otherwise fantastic thanks | |
