<p>The mills are currently derelict and present both a danger to health and safety and are an eyesore. I am very much in support of the proposal to use as much of the existing building as possible to develop into useful space, be that retail or residential. I applaud the intention to provide public space both for parking and for leisure.</p> <p>I understand plans include the safe management of traffic, especially of goods wagons and heavy plant. I am surprised the planning process has thus far been long-winded and fearful that the development will not happen if there is much more procrastination. My hope would be that the work can start soon and be executed quickly with regard for residents living close to the mill, and that it will be completed before major work begins on the railway bridge. Should the two projects coincide, I fear it will be chaos.</p>
