Subject: 2026/90255 at location Wye, Wheelwright Drive, Dewsbury, WF13 4JB

Please see ecological commentary below:

Designations

No issue

Onsite habitats and species

There is a bat license return within 200m of the site.

The site consists of 1 no building, hardstanding, vegetated garden, and 7no scattered trees, and an ornamental hedge.

All trees are to be retained onsite. The building is to be demolished. The site would offer opportunities for bats and birds. Tree protection measures and lighting strategy would need to be conditioned.

No photos of the building onsite, due to the fact it is to be demolished a Preliminary Bat Roost Assessment will need to be conducted prior to determination under Case Law (CO/2820/2008 / 2009 EWHC 1227(Admin)).

BNG

The BNG Assessment report and metric have been reviewed. The baseline calcs have been validated.

There will be a net loss of 0.01 habitat units and a net gain (14.48%) of hedgerow units. It is noted that the site value will increase by 0.01 habitat units.

0.34 habitat units are required to achieve the statutory 10% net gain. A Biodiversity Gain Plan to achieve this will need to be conditioned.

Suggested conditions

BNG condition for 10% net gain to be provided.

PBRA to be conducted and report provided prior to determination.

Habitats / Species

A condition for a CEMP: Biodiversity (Construction Environment Management Plan) is advised, e.g.

No works shall take place until a Construction Environmental Management Plan (CEMP: Biodiversity) has been submitted to and approved in writing by the local planning authority. The CEMP (Biodiversity) shall include the following:

- a) Summary of potentially damaging activities
- b) Identification of "biodiversity protection zones"
- c) Practical measures (both physical measures and sensitive working practices) to avoid or reduce impacts during construction (these may be provided as a set of method statements)
- d) The location and timing of sensitive works to avoid harm to biodiversity features.
- e) The times during construction when specialist ecologists need to be present on site to oversee works.
- f) Responsible persons and lines of communication.
- g) The role and responsibilities on site of an ecological clerk of works (ECoW) or similarly competent person.
- h) Use of protective fences, exclusion barriers and warning signs.

The approved CEMP: Biodiversity shall be adhered to and implemented throughout the construction period strictly in accordance with the approved details, unless otherwise agreed in writing by the local planning authority.

Reason: In the interests of biodiversity and in accordance with LP30 and NPPF15

Lighting strategy

No works are to commence unless a detailed lighting scheme, developed in accordance with established guidance (e.g. Bat Conservation Trust and Institute of Lighting Professionals (2023) Bats and Artificial Lighting at Night), has been drafted and agreed with the council. The Sensitive Lighting Strategy will demonstrate that the proposed lighting will not impact upon ecological networks and/or sensitive features. Thereafter the agreed lighting scheme shall be implemented, subject to any variations approved in writing by the planning authority. All external lighting shall be installed strictly in accordance with the specifications and locations set out within the Lighting Strategy.

Reason: In the interests of biodiversity and in accordance with Policy LP30 and NPPF15

Tree protection

A Hedgerow and Tree Protection Plan detailing measures for the protection of trees and hedgerows during the works will be submitted to and approved by the LPA prior to the commencement of works on site, including site clearance and delivery of materials.

Hedgerow and tree protection measures will include temporary fencing for the protection of hedgerows in accordance with BS 5837:2012 Trees in relation to design, demolition and construction – Recommendations. Any alternative fencing type or position not in accordance with BS 5837:2012 will be agreed in writing by the LPA prior to the start of development.

The root protection fencing will define the works exclusion zone around hedgerows and trees. Activities liable to be harmful to hedgerows and trees are prohibited within this exclusion zone, unless agreed in writing with the LPA. The approved hedgerow and tree protection measures will remain in place until the completion of development or unless otherwise agreed in writing with the LPA.

Reason: In the interests of biodiversity and in accordance with Policy LP30 and NPPF15

Many thanks,
Katie
