<p>I am writing this due to concerns and objections of the planning. The buildings are beign built in a rush and land has already beign prepared for the house. My concerns are that there is space for additional 14 cars which will have access to north park street to gain access to these properties. The road already has built up traffic and double park on a daily basis, it has people speed on round the bend constantly, you have learners driver's on here all the time, driveways which could become blocked and unable to gain access to. You also have the general factor of the street has a lot of elderly and vulnerable people which would become hard for emergency services to gain access. The properties will attract more than 14 cars so the street will become a more of a built up area and sidewalk will become blocked. I know alot of people use these such as school children, families, carers, prams, wheelchair ect. The road conditions it self is bad enough with pot wholes. I would also like to add that you have disabled people living near by who are more likely to blocked in from extra cars and building people. The road and street its self will become dangerous.</p>
