14<sup>th</sup> January 2026

### **Tree Report.**

**Location ;** To rear of main building to the west elevation.

**Tree;** English Oak - (***Quercus robu***)

On inspection the tree is in good health, small amounts of deadwood visible on some limbs, tips are now reaching slightly towards the neighbour's property, this is due to its location within 10 meters of building.

### **Recommendation.**

To keep the tree in good health I would recommend removing any deadwood from within the crown pruning limbs away from the building by 2.5-3m and a maximum of 100mm (4") diameter.

Kind Regards

David Jowett
