The development will generate a substantial increase in vehicle movements from: Residents Visitors Delivery vehicles Construction traffic If the site is accessed via existing residential roads, these may not have been designed to accommodate additional traffic at this scale. There are concerns regarding: Congestion at peak times Highway safety risks Insufficient parking provision leading to overspill parking Pedestrian safety, particularly for children and elderly residents. There has already benn fatalities on White Lee Road, do Kirklees want more blood on their hands? I am sure you do not. Unless robust evidence demonstrates safe access and adequate capacity, the proposal risks harming highway safety and the supporting documents provided appear to be lacking any actual evidence. There are many other reasons why this should be rejected, but I cannot fit it into the 500 character restriction.
