<p>Planning Application 2026/62/90310/E</p> <p>There have already been far too many new houses built in the area resulting in an irreversible loss of green field and farmland, there are plenty of brownfield sites in around Batley and Birstall area which could be utilised but all too often councils simply cave into pressure from developers because it is easier for them to destroy our green fields than redevelop old industrial or commercial sites, the law needs to change to protect our dwindling green spaces. To add to this the area supports a wide variety of birdlife, in the area there has been spotted Sparrowhawks, Buzzards, Herons, Owls and even Red kites, also have seen Lapwings on this land not to mention a wide variety of garden birds and foxes. Also the area supports Bats which are supposed to be protected by law. Where does all the wildlife go when you destroy their habitat with houses? The previous building of houses that occurred in that area at Asquith fields also caused a lot of noise and disturbance in the local area. Stop destroying the little green space we have left in Kirklees, it should be brownfield or not at all.</p>
