Please remove my name and address from the public post I strongly object to the proposal to build additional housing on White Lee. The surrounding area is already experiencing significant pressure on local infrastructure. Traffic congestion is a daily issue, and the current road network is already struggling to cope with existing demand. Adding further housing will inevitably increase vehicle numbers and place even greater strain on roads that are already operating beyond a comfortable capacity. Local services are also under considerable pressure. Schools in the area are already at or near full capacity, making it difficult for existing residents to secure places for their children. Similarly, access to healthcare is already limited, with many residents experiencing difficulty obtaining timely appointments with local GP surgeries. Introducing a significant number of new residents without clear evidence of additional school places, medical provision, and infrastructure improvements would further exacerbate these existing problems. In its current form, the proposal fails to adequately address the cumulative impact that additional housing will have on traffic, education provision, and healthcare services in the area. For these reasons, the development would place an unsustainable burden on local infrastructure and should not be approved.
