I would like to object to this application. The application site lies within designated Urban Green Space under the Kirklees Council Local Plan so building on it would result in the loss of urban green space in an area that has very little left. The proposed access also appears to be via a public footpath which has no vehicular right or access and there is no room to make any. The proposal would mean more traffic on Enfield Drive and even more vehicles parking on the street which will surely make it more dangerous for pedestrians and drivers. If the public footpath space is used for vehicle access for this house then those of us who use the path are less safe and we have to walk on somebody's drive instead of enjoying a semi rural footpath.
