I am submitting this objection again as the one I submitted on Tuesday does not seem to show on this application. So apologies for any duplication. I would like to object to this application. It is building on land that is designated urban greenspace on the Councils unitary development plan. We need to keep the little green space we have remaining round here, not build on it. The only access to the proposed house is via a public footpath which is not suitable for cars. If the cars from the property have to park on the street that will make an already overparked stretch of street even more dangerous for pedestrians and drivers. If you allow the footpath to be taken to give access to this property, where do those of us who currently enjoy the semi rural feel of the footpath go? Please reject this application.
