[Please do not publish my address or any personal details.] To whom it may concern. I support in principle the renovation of the church building within its existing footprint into residential use. There is much to be applauded within the proposals. I would, however, like the following considerations to be taken into account and if the application is approved, conditions applied as appropriate: - The large windows to the west elevation are proposed to no longer be stained glass, which therefore will have a negative impact on the privacy of neighbouring properties that have windows in close proximity. Obscured glass or other mitigation is requested. - Pedestrian and vehicle access to neighbouring properties via the access drive to the west of the church building to be maintained at all times. - Further satisfactory information to be provided regarding waste and recycling, including how and where the bins or containers will be managed and presented.
