Address of the site or building:	Land between, Woodhead Road and Far Banks, Honley, Holmfirth, HD9 6NW
Postcode:	

User comments

Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	Yes
It is claimed that the site is brownfield but this is incorrect: it is in Kirklees declared greenbelt and has been used for stock grazing for 40+ years. It has NOT been previously developed. To say the site is bordered by residential development is incorrect; the applicant is proposing a single house which would be surrounded by the remainder of the greenbelt land that is subject to this application, thus irreparably harming the valuable greenbelt land's ability to 'break' development. Despite the Applicant's claim, access to this plot is not level and would require a slope down OR the house would be elevated and be even more of a visual blot. The route to public transport is not direct, but via Far Banks - no footway on this side of a national speed limit road - leading to a footpath down to Woodhead Road
