

Kirklees Council – Tree Maintenance Request

Date: 18 February 2026

Address: 9 Craig Close, Batley, WF17 0EX

Email:

Subject: Request for inspection and trimming of overhanging tree

This document provides photographic evidence of a large mature tree located beyond the rear boundary fence at 9 Craig Close, Batley, WF17 0EX. The tree canopy extends significantly over the property and close to the roofline. There is ongoing accumulation of leaves, moss, and organic debris along the patio area, property wall, and near the kitchen window. We respectfully request inspection and appropriate maintenance to reduce overhang and associated impact.

Photo 1 – Fallen Debris Along Property Wall & Kitchen Window: Accumulation of moss, twigs and leaves along patio and wall. Leaves collecting near kitchen window require frequent clearing.

Photo 2 – Tree Height and Proximity to Roof Line: Large mature tree extending significantly above boundary fence. Upper branches extend close to roofline, raising concern during high winds.

Photo 3 – Overhanging Branches Above Garden: Branches extend over fence line and patio area. Overhang contributes to falling debris and shading of garden space.

We respectfully request that Kirklees Council assess the tree and consider trimming the overhanging branches to prevent further debris accumulation and reduce potential risk to the property.
