Consultation Response from KC, Trees
2026/90702 Fieldhead, Snelsins Road, Cleckheaton, BD19 3UE
Demolition of existing outbuildings and erection of detached leisure building, car port and annex accommodation associated with Fieldhead, Snelsins Road, Cleckheaton, BD19 3UE
Date Responded: 15/04/2026 **Responding Officer: Hazel Irving** **Responding Ref: SP2/70**

There are trees within your property subject to Tree Preservation Order SP2/70

A Tree Preservation Order is an order made by a local planning authority in England to protect specific trees, groups of trees or woodlands in the interests of amenity. An Order prohibits the:

- cutting down
- topping
- lopping
- uprooting
- wilful damage
- wilful destruction

of trees without the local planning authority's written consent. If consent is given, it can be subject to conditions which have to be followed. In the Secretary of State's view, cutting roots is also a prohibited activity and requires the authority's consent.

It is understood that the proposed pool house is sited mindfully to avoid the adjacent protected tree. However, for applications to demonstrate that they meet the requirements of Kirklees Local Plan policies, all planning applications, that may affect trees, are supported by the necessary documents set out in British Standard BS 5837, Trees in Relation to Design, Demolition and Construction Recommendations. On that basis the following documents are required in support of planning applications, all of which should be in accordance with BS 5837:

Detailed/full planning applications:

- A survey of the trees located on, and immediately adjacent to, the site and/or are capable of influencing the proposed site. To include assessment of the condition of the trees and their retention value.
- An Arboricultural Impact Assessment. Which should incorporate a realistic assessment of the probable impact of any proposed development on the trees and vice versa. To include but not limited to; assessments of the factors set out in section 5 of BS 5837; plan overlaying the proposals with tree constraints including shade patterns; evaluation of impact of proposed losses and necessary pruning; draft tree protection plan
- An Arboricultural Method Statement to demonstrate that proposed operations can be undertaken with minimal risk of adverse impact to the trees to be retained. To include, but not limited to, special engineering within root protection areas and other relevant construction details, any site monitoring and a timeline of proposed operations.
- A Tree Protection Plan which is superimposed on to a layout plan based on a topographical survey and tree survey. This should include the precise location of protective barriers, the extent of any ground protection, and additional measures that will be installed to safeguard trees and their root protection areas.
- A schedule of works, to include facilitation pruning and any landscaping details.
- Details of existing and proposed levels.

There is a holding objection from an arboricultural perspective. The proposal conflicts with adopted Kirklees local plan policy 33 and 24 (i).

LP 33: "The Council will not grant planning permission for developments which directly or indirectly threaten trees or woodlands of significant amenity value.

Proposals should normally retain any valuable or important trees where they make a contribution to public amenity, the distinctiveness of a specific location or contribute to the environment, including the wildlife Habitat Network and green Infrastructure networks. Proposals will need to comply with relevant national standards regarding the protection of trees in relation to design, demolition and construction."

LP 24: "Proposals should promote good design by ensuring:- i) the retention of valuable or important trees"
