An application of this kind has been needed for the Grange Moor/Flockton area for some time. Between both villages there is nothing within walking distance except 2 small local shops that have the very basics with a very limited choice of premade meals for workers/residents with an industrial space within the vicinity and one more development already ongoing.

I have worked on the industrial estate at Grange Moor for the past 12 years and all staff within the company have always said Grange Moor has nothing to offer and is in dire need of at least 1 if not more large chain food/drink shops especially with how busy the road is between Huddersfield/Wakefield and the local link between the M62/M1.

The proposed building has been passed from business to business over the years, with none of them succeeding due to the location. This development makes perfect sense with the option to capture customers from both the busy passing roads and footfall from the local area without a large change to the functionality it was originally designed for.

This building has slowly become old, run down and from the outside it is looking visibly tired making the area seem neglected. Refurbishment of this building and its proposed use should be approved.

I have full support for this application.
