

Appendix A – Climate Change Statement

Climate Change Statement for Planning Applications

Part 1: Applicant details

Name of applicant/agent	Mr. and Mrs. R. Wilson
Site Address	10 Green Bottom Meltham, HD9 4BD
Description of Development	Proposed single storey extension to rear.

Part 2: Climate Change Mitigation measures

Please respond to the following questions considering the measures set out in the Climate Change Guidance note:
Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)
Existing house is brand new and to current building regulation. The extension ensures to meet current building regs. glazing is toughened, 'Argon' filled, double glazed, A+ rated glass.
Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3)
Materials are sourced locally and building company is local using local people on site.
Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)

The house is insulated to the latest insulation parts and the new parts also are the best to reduce carbon energy uptake.

Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the Building Regulations ? (See section 5)

Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)

A gutter is provided to be taken to the existing surface water drain.

Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)

A surface water drain is provided as existing so no further water will affect the ground

Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)

Building will, if necessary (as in machine use) will be used by local people, so transport minimal and use of only one vehicle.

Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)

The use, only, of electric power tools to be implemented and these to be provided with dust bags, so keeping air quality good.
