Substantial increase in traffic attempting to access an already busy road on a particularly fast and dangerous stretch with limited visibility both from the site exits and for passing traffic. Adverse effect on biodiversity - barn owls nest on site and presumably so do bats as we see them in our garden. Adverse effect on neighbouring listed buildings and rural character of area Any change to natural drainage patterns caused by the development particularly with regard to surface water and package system drainage proposed may well adversely affect Liley Cottage which is downslope from the site. Increase in light pollution
