Subject: RE: 2026/90880 | 2026/20501 | 11-26/2 at location Liley Hall Farm, 3, Liley Lane, Upper Hopton, Mirfield, WF14 8EG

On the information provided Prow would likely object to this application. The access to the site is public bridleway Kirkburton 159 and public bridleway Mirfield 84, The bridleways just show as existing on the plans with no indication of how they or the users will be protected both during and after development. This route is part of a large bridleway network in the area and we are aware of users on foot, horse and cycle.

I have concerns regarding the amount of buildings on a small site and how this will impact on the bridleway. I would expect to see further information covering these points. The route also does not seem wide enough to allow a vehicle to pass a horse with safety during certain sections.

The proposal also has at least 5 parking space that indicates vehicles reversing onto the bridleway

The proposal indicates that all buildings will be converted, currently there is a gate at the entrance from Liley Lane that should be removed as it would not be needed for agricultural use
