Dear Sir,

We enclose the following comments for your consideration:

- 1 Is the capacity of the water supply adequate? We share a water main.
- 2 We hope we don't lose the pleasing aspect of the old stone walling along the lane and facing the listed properties.
- 3 The corner where the side and rear elevation meet appears to be less than a car's width from the existing boundary.
- 4 Due to significant physical impairment vehicular access along our entire lane from Cowrakes Road to our gate is necessary 24/7. Advance warning of the contractor's requirements is essential, arrangements need to be agreed between all of us.

Please could you let us know how the above items can be achieved.

Regards
