<p>Whilst i am always in favour of making sure children get a good education and have a good school to do that. I am afraid you have not thought about the effect this new building will have on the neighbours around the site. Not only are we going to have months of constant noise and disruption but we are going to have a monstrosity of a building facing the back of our house when finished. You have not thought about the effect this is going to have on those affected. In fact at your consultation event you had already made your minds up that this was going ahead despite objections and listening to those who were very concerned. I appeal to you to reconsider the design of this application so as not to cause a negative impact on those who are affected by the works and the end result. We are utterly overwhelmed and disappointed and feel like no one as listened to our concerns and how this is going to affect us.</p>
