<p>I do not want any of my personal details to be shared on the website for privacy reasons.</p> <p>In my opinion, I this planning application will benefit members of the local community greatly. I wholeheartedly support the plans to make a real investment in the education of young people and create a modern, inspiring school that pupils want to go to. From viewing the application, I can see that there will be an abundance of outdoor space. This will help pupils to learn through experiences and develop an understanding about preserving and caring for nature and surrounding areas.</p> <p>Not only will this benefit the families and pupils in attendance of the school I also believe this will have a substantial, positive impact on members of the local community. The school could act as a hub for community members to join together and continue to develop strong, positive relationships with one another.</p> <p>I can appreciate that this may cause some disruption for neighbors. However, from viewing the Comprehensive Construction Environmental Management Plan (CEMP) I can see that there have been extensive measures accounted for in order to attempt to minimize the overall disruption.</p> <p>Overall, I am in full support of the plans for the new development and feel strongly about the positive impact it will have on my local community.</p>
