Our request

We, the undersigned, wish to express our support for the proposed self-build dwelling at Parkton Grove. We respectfully ask Kirklees Council to give full and proper consideration to the planning merits of the proposal and, if officers are minded to refuse the application under delegated powers, to allow the case to be considered by the District-Wide Planning Committee so that elected members can assess the proposal in the round.

Why we support the proposal

- **Self-build housing:** a genuine, high-quality family home making a positive contribution to local housing need.
- **Sustainable location:** a well-connected site close to existing homes, services and public transport.
- **Landscape-led design:** the proposal has been shaped around the site's wooded character, existing topography and relationship with Parkton Grove.
- **Professional evidence:** the application is informed by architectural, planning, heritage, arboricultural, ecological and landscape specialists.
- **Trees and planting:** better-quality trees are retained where possible, with replacement and enhanced planting intended to reinforce screening and woodland character over time.
- **Biodiversity:** naturalised planting and habitat measures, including bird, bat and invertebrate features, are proposed.
- **Low-carbon principles:** the home is designed to maximise natural light and incorporate energy-efficient, low-carbon systems.
- **Constructive engagement:** the applicant has responded to Council feedback with revisions, further evidence and additional specialist input.

By signing below, I confirm that I support planning application 2026/90938 and ask that, if officers are minded to refuse it, the application is referred for consideration by Planning Committee.
