

Appendix A – Climate Change Statement

Climate Change Statement for Planning Applications

Part 1: Applicant details

Name of applicant/agent	Ms C Ellis
Site Address	29 Pollard Way Gomersal BD19 4PR
Description of Development	demolition of existing conservatory. erection of single storey rear extension and front porch.

Part 2: Climate Change Mitigation measures

Please respond to the following questions considering the measures set out in the Climate Change Guidance note:
Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)
additional wall insulation over standard
Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3)
locally sourced materials wherever possible.
Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)

low carbon options will be used when applicable
Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the Building Regulations ? (See section 5)
additional wall insulation over standard
Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)
existing floor level to be maintained. no flood risk
Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)
no additional water stress will result in this development.
Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)
not applicable. flat roof built on exiting flag patio.
Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)
extra insulation will reduce boiler use therefore carbon emission
