

## **DESIGN AND ACCESS STATEMENT**

**Site:** KD Afro Ltd, Huddersfield

The proposal is for the installation of one double-sided non-illuminated projecting hanging sign to the front elevation of the existing retail unit.

The design is simple and traditional, using a black metal bracket with a cream sign panel and dark green lettering. The scale and positioning have been chosen to be in proportion with the shopfront and to respect the character of the building.

The sign will be fixed into mortar joints to avoid damage to the building fabric and will not obscure any architectural features.

The site is an existing commercial premises with level access from the street. The proposal does not affect access arrangements for customers or pedestrians.
