. I fully endorse the comments contained in the application supporting statement. At present pulling out of my drive has restricted visibility and road width, the application will not stop other road users travelling too fast, but at least the application will improve the visibility and available road width making pulling out safer and easier and reducing the risk of a collision. Further on numerous occasions I have seen delivery vans, commercial vehicles, buses, and many other vehicles drive upon the pavement to pass by . In my opinion if approved the creation of off road parking at number 8 will significantly improve the character of the area by reducing on street parking on a narrow road & in doing so will improve the safety of all users of the highway & pavement.
