Now I'm not the best at writing but I feel my comments need to get said and noted. I hope they come across clearly. This land is a greenbelt area, and should be protected. It's been used for years as grazing land and a home to nature including lapwings and curlews. Green Belt Harm (Kirklees Local Plan Policy LP60 / NPPF Chapter 13)The proposal represents inappropriate development in the Green Belt, which is by definition harmful unless very special circumstances are demonstrated. Traffic, the field has always had access via the back of gates head (gate head bank) Now there is suddenly an entrance on meltham road, which impacts traffic as it's in a bit of a blind zone. Does this new current access not need permission or at least safety checks. There's also been a lot of quiet and hush about this development. Hope can something so big and damaging go by so quietly without much word to the public. At KC wanting this built regardless? I also feel for the neighbours in this situation. It looks like boundary lines will be a huge issue for next door neighbours.
