I wish to object to application 2026/64/91272/W for the erection of six illuminated signs at Playworld, 152 Westbourne Road. My family and I live directly opposite the premises, and the proposed illuminated signs would face directly towards the front of our home, including our living room and bedroom windows. We are extremely concerned about the impact of six illuminated signs on our residential amenity. The additional lighting has the potential to create significant light pollution during the evenings and at night, affecting our enjoyment of our home and disturbing our ability to relax and sleep. Unlike commercial premises, our property is occupied throughout the evening and overnight, so the effect of illuminated signage would be experienced on a daily basis. We are also concerned that the number of illuminated signs proposed is excessive. The cumulative effect of six illuminated signs would be visually intrusive and out of keeping with what is predominantly a residential area. We believe the proposal would have an unacceptable impact on neighbouring residents who live directly opposite the site. We respectfully ask the Council to give significant weight to the effect this proposal would have on the amenity of nearby homes. If the application is approved, we request that stringent conditions are imposed to restrict the brightness of the signs and the hours during which they may be illuminated, ensuring they are switched off at a reasonable evening hour to minimise disturbance to local residents. Thank you for considering our comments.
