Access to the field from Penistone Road is going to cause major problems considering the size of vehicles needed for constructing the road and vehicles transporting materials. I have observed speeding, dangerous driving frequently as a pedestrian walking past what would be the access gate. For residents bordering the field noise, Headlights and any lighting required even if temporary are going to be problematic. The air pollution too from the dust and disturbance to obtain a flat track. We will have these issues as the track is constructed and the site made along with a turning circle. Then again when it is all demolished. It affects a large number of people who will have to live with these disturbances. Wild life will be impacted and I feel visits to my garden over the past few years have already declined. Peace and quiet and a love of this countryside are a critical attraction to Birdsedge. I feel the access, construction of the track will pose problems to residents and visitors, particularly school pick ups and drop offs.
