<p>They say no outside work is proposed but currently working on the roof and ground level area right now. They say no trees are in the area but that isn't true , there are lots. They say only cars on site but there are vans also. Often there are cars and vans parked outside the premises (owned by them) on the public pathway blocking access. Junior school opposite and has a lots of school traffic and school children crossing. Says size of site is 25sq meters but actually size of space been lost is 400 sq meter. Says it has 3 previous employees which is a lie because it was a church run by 1 man which doesn't have anything to do with it now. Is ALREADY being used as a desert shop without actual permission. So that means the declaration which has been signed is falsely signed. And says there's plenty more places to worship in the community which is also an utter lie. It was a Catholic Church previously and SHOULD remain a Catholic Church for possible future reopening . And maple road access IS being used also, I've just seen a white Audi A3 reverse out of there and there's a refrigerated van parked in there which has clearly used that access.</p>
