Although I do support the village needs more housing I have concerns regarding parking We're the property is located it sits on a busy junction with high volumes of traffic along with heavy good vehicles visiting the farm and high volumes of farm traffic There is just no space for a potentially 4 more vehicles to be parked on the highway Neighbouring property's already park large commercial vehicles blocking the view of the junction from new lane and high street due to no other parking spaces available So we're are these new residents going to park? Also due to high volumes of residents parking vehicles on the highway the local bus service struggles to negotiate around the junction The previous owners of the office didn't come to work in there veichel as the family lived just down the road and walked to work with only 1 member of staff driving to work not the 8 employees as stated in the application I think the planning officer needs to consider the application for 2 dwellings as not suitable but should be reduced to 1
