

General Notes

This drawing is issued for the purposes of a planning submission and should not be used for construction. Do not scale of this drawing except for planning purposes. The existing building information is from a previous application and all dimensions should be checked by future designers and contractors.

All proposals presented remain subject to statutory approvals, including but not limited to local planning consent, building regulations, and other regulatory compliance.

Final designs and specifications are contingent on input from the full consultant team (e.g. Mechanical & Electrical engineers, Structural engineers, Quantity Surveyors). Responsibility for detailed design development, coordination, and verification lies with the relevant consultants and the appointed contractor.
